

Promote Early Mobility, Elevate Patient and Staff Safety

BAM Air LC is an air-powered, lift-compatible patient positioning system designed to keep patients protected from skin breakdown while promoting safer patient handling.

Force Reduction

Superior Absorption

Sacral Offloading

Scan to Learn More

Position Perfect® Wedges

Proper sacral offloading achieved throughout duration of turns with immersive foam to keep patients comfortable, wipeable fluid barrier for infection control

ComfortTop® ES Absorption Pad

Absorbs 3,000 ml of fluid to keep patient skin dry and assist with microclimate management¹

Repositioning Sheet

Reduces the force required to initiate a lateral transfer by 80-90%, with a wipeable material for simple clean up if soiled¹

Quick Connection Port

Attaches easily to pump for secure connection and set up

Immersive Design

Side cushions help cradle the patient for improved safety and comfort, while helping keep them in the center

Strap Pockets

Secured area for Lift Straps when not in use

Side Stripes

QR codes, infographics, and product instructions for point of care education

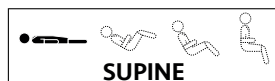

Reinforced Handles

Multiple handle locations allow staff flexibility to help maintain proper body mechanics and reduce the force required to move patients

Lift Straps

Compatible with 2- and 4-point hanger bar configurations throughout the hospital with ceiling and mobile lifts

Multiple Lifting Postitions

Ordering Information

Flexible spending and flexible ordering. Order the full system or individual components.
