

Foot WAFFLE Heel Protectors

Clinically Proven, Ease of Use, and Patient Comfort

Foot WAFFLE® Heel Protector is a high-quality solution that helps improve patient comfort through clinically proven static air technology. When using Foot WAFFLE, you can have confidence the heel is effectively offloaded throughout the continuum of care.

✓ **Open Foot Gate**

✓ **Low Profile Design**

✓ **Proper Heel Offloading**

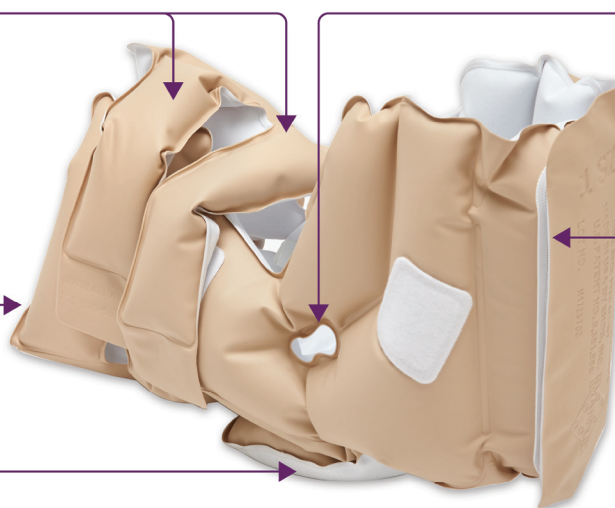

Scan to Learn More

• **Air Filled Straps**
Provide patient comfort across the top of the leg and foot

• **Proprietary Material**
Engineered for patient comfort and safety. Antimicrobial agent is blended into the material

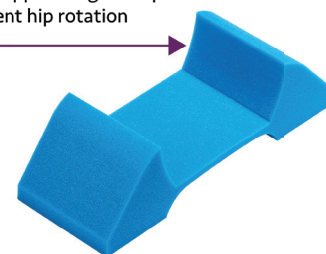

• **Air-Filled 'Pillow' Pad**
Comfortably and properly offloads the heel

• **Tubing Ports**
Allow for convenient placement of SCD, ICD, or NPWT tubing

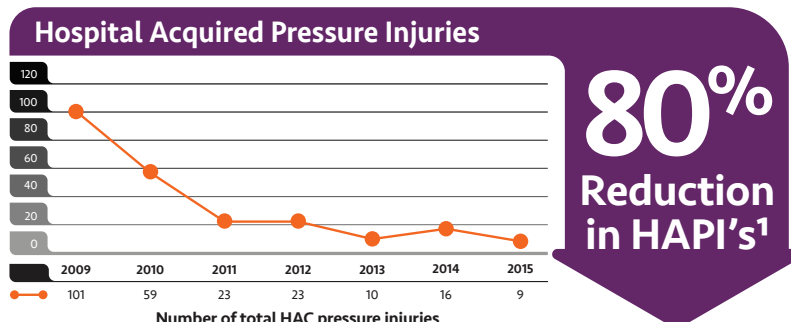

• **Open Foot Gate**
Provides easy and efficient access to the foot for skin and heel offloading assessments

• **Anti-Rotation Wedge**
Optional wedge stabilizes and supports leg to help prevent hip rotation

Clinically Proven

As part of a comprehensive pressure injury prevention program, EHOB® Foot WAFFLE helped achieve the following results.¹
