

Introducing BAM Air+ System

Patient Protection from Head-to-Toe

BAM Air+ is an air-powered patient positioning system that seamlessly integrates into your workflow and keeps your patient's full body protected during turns, boosts, and lateral transfers.

✓ **80-90% Force Reduction¹**

✓ **Superior Absorption**

✓ **Sacral Offloading**

Scan to Learn More

- Position Perfect® Wedges**
Proper sacral offloading achieved throughout duration of turns with immersive foam to keep patients comfortable, wipeable fluid barrier for infection control
- Head Support**
Elongated design allows for head-to-toe protection when moving patients
- ComfortTop® ES Absorption Pad**
Provides exceptional strength and moisture wicking capabilities, oversized to cover Repositioning Sheet for greater absorption area
- Reinforced Handles**
Multiple handle locations allow staff flexibility to help maintain proper body mechanics and reduce the force required to move patients
- Repositioning Sheet**
Friction reducing nylon helps reduce staff effort and enables smooth movements, with wipeable material for simple clean up if soiled
- Side Stripes**
Infographic and product instructions
- Quick Connection Port**
Attaches easily to pump for secure connection and set up
- Immersive Design**
Side cushions help cradle the patient for improved safety and comfort, while helping keep them in the center
- Extender Straps**
Preferred hand placement helps maintain proper body mechanics
